How Can I Join?

Questions?

- Two compulsory modules to substitute your 40 optional credits in year 3
  - 'SLSP3065 Quantitative Social Research I' in term 1
  - 'LAW3287 Quantitative Social Research II' in term 2
- A quantitative dissertation
- Other optional workshops, events and competitive placements available through the Q-Step Centre

How Can I Join?

Questions?

# SLSP3065 Quanti. Social Research I

- Syllabus
  - Recap of different types of variables
  - Statistical tests (establishing significance)
  - Data manipulation
  - Regression modelling (what is the effect of X on Y?)
- Learning activities
  - Two-hour sessions in a computer workshop
  - First hour theoretical
  - Second hour applied exercises using R
- Data used throughout the course
  - Crime Survey for England and Wales
  - Labour Force Survey
- Assessment
  - $-\,$  Ten weekly take-home individual exercises (10%)
  - 2,000 words assignment exploring a research question (90%)

How Can I Join?

Questions?

# LAW3287 Quanti. Social Research II

- Syllabus
  - Modelling strategies (to predict and to explain)
  - Data quality (missing data)
  - Advanced regression (multilevel modelling, longitudinal data, time-series, and many more)
- Learning activities, two-hour sessions in a computer workshop — Flipped-lecture format
- Examples of dataset used throughout the course
  - Labour Force Survey & European Social Survey
  - MoJ Criminal Justice Statistics & Crown Court Sentencing Survey
  - Pathways to Desistance (young offenders survey)
- Assessment
  - Eleven formative exercises, one of them offering individual feedback
  - 3,000 words assignment exploring a research question (100%)

How Can I Join?

Questions?

# LAW3287 Quanti. Social Research II

- The two modules are highly applied
- We see quantitative methods as research tools
- Which help us answer important research questions:
  - Which offenders are more likely to be sentenced to custody?
  - Is there a gender pay-gap in the UK?
  - How does procedural justice affect offending behaviour?
  - Which countries report higher trust in the police?
  - Why are different crime types unevenly distributed across states?
  - Have the Sentencing Council guidelines increase punitiveness?
  - and many more

- How Can I Join?
- Questions?

- The same format as a 'normal' dissertation
  - -40 credits
  - Same word limit
- Must include some form of quantitative data analysis
  - Primary data analysis (surveys, content analysis, observations, etc.)
  - Secondary data analysis (official statistics, police data, national surveys)

How Can I Join?

Questions?

• No prior knowledge of maths or statistics required

- Very little mathematical notation
- Focus on application of techniques using software
- and real datasets used by Criminologists and Sociologists
- Emphasis placed on interpreting results intuitively
- The following skills are however essential
  - Numeracy openness towards evidence presented numerically
  - IT skills competent using computers
  - Resilience tolerance to frustration

How Can I Join?

Questions?

### • Become critical and independent Criminologists

- Quantitative Criminology research is growing quickly
- Most Criminologists cannot fully engage with it
- You will get the skills needed to evaluate evidence critically

Why Should I Join?

And to undertake that research yourself

How Can I Join?

Questions?

### • Become critical and independent Criminologists

- Quantitative Criminology research is growing quickly
- $-\,$  Most Criminologists cannot fully engage with it
- You will get the skills needed to evaluate evidence critically

Why Should I Join?

- And to undertake that research yourself
- Substantially enhance your employability
  - Data analysis is a highly valuable and transferable skill (huge shortage amongst Social Scientists)
  - Necessary to carry out research, but also to commission, or to simply interpret it
  - In high demand across all sectors (academia, government, private sector and charities)
  - Graduate as 'BSc (Hons) Criminal Justice and Criminology with Quantitative Research Methods'
  - Only six 'Quantitative Pathways' with Criminology in the UK
